## PROJECTS

### Medicon

Tools & technologies used: HTML, CSS, JavaScript, and NodeJS.

I created a E-commerce website for selling pharmaceuticals and healthcare products. The website has an easy-to-use design that makes it simple for people to log in and register. It helps in marketing pharmaceutical and healthcare products by providing a user-friendly experience for buyers and sellers.(Code Link)

### Health Stack

Tools & technologies used:ReactJS, NodeJS, MongoDB and Express.

Analyzed a tool to sell Medicines,Health care Products.

Took on a pivotal role within a team of five, contributing extensively to front-end collaboration.

Designed a interface for user to add product if he is a seller and also done FAQ page.(Code Link)

### Hand-Gesture-Recognition

Initiated a project which recognizes hand gestures and had quantified success using Convolutional Neural Network(CNN). Currently we are working on operating a virtual drone using hand gestures.

Led a role in creating data-sets and worked on research papers.
